About This Game

OVERVIEW

The main purpose of this game is showing and watching machines made out of blocks.
Some of the game-modes allow you to battle or race against other players. (testing phase)
You can create your original machine with ease by reassembling those machines that are distributed,
or by using the automatic control block.

CRAFT

By using plastic chassis and functional parts, you can make a variety of shapes and movements,
such as standard machines(cars, bikes, tanks, airplanes, helicopters, ships), as well as
unique machines (transformation-robots, arm-cranes, animals, plants, meals).
Additionally, you can place boxes of any size to make a simple stage.

MULTIPLAY

You have the freedom to make a room and set the rules as you want, and maximum of 30 people can join.
Currently lounging around is the mainstream, but I am aiming at enhanced competition in the future.

My goal is to make this game into a place where people can feel free to make their room in their own rules without serious conflict.

You cannot find a more sandbox sandbox game than this one.. Good game but has a few glitches.. It's good, just need to fix the foreign language buttons, overall nice game 11\/10. GIVE US CHEAT CONSOLE PLZ!!! >:(. You can create a loli-mecha-transformer-toilet...THAT'S AWESOME. I haven't played this game much but it is amazing as far as there are any concerns the only ones i can come up with are: Tutorials don't do much and that there arent much people on it. It's amazing.

Made a truck with G.I.T.S laughing man logo on the side, then server crash for some reason, re-enter, everyone is out to kill me...
10\/10 would be blame for hacker again XD. i have accepted i cannot make flying spagetthimonster with 65 joints without creating bugs....

other then that the game is fine
and i love the fact that because the effort, skill and iq needed to play this game
keep the sorry for the language but just plain morons from playing game.
